DETAILED ACTION

1. Applicant's election without traverse of position 247 consisting of isoleucine and SEQ ID NO:1, filed on July 25, 2008, is acknowledged.

Claims 1-20 and 25 have been canceled.

Claims 21-24 are pending and currently under consideration as they read on the elected species of a monoclonal antibody comprising a variant of a parent human Fc region, wherein the amino acid sequence of the parent Fc region is SEQ ID NO:1, and wherein the variant consists of a parent human Fc region substituted at position 247 with isoleucine.

- 2. Applicant's IDS, filed on June 22, 2006, has been considered.
- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112: The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 21-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 21-24 are indefinite in that they only describe the number of amino acid residue positions without reciting the numbering system.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 5. Claims 21-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Lazar et al. (US 2004/0132101).

The claims are drawn to a monoclonal antibody comprising a variant of a parent human Fc region wherein the amino acid sequence of the parent human Fc region is SEQ ID NO:1 (the elected species), and wherein the variant consists of a parent human Fc region substituted at position 247 with an amino acid isoleucine. It is noted that SEQ ID NO:1 is the amino acid

Application/Control Number: 10/584,692

Art Unit: 1644

sequence of human IgG1 Fc region (see attached sequence alignment). The amino acid residue in position 247 of the parent human IgG1 Fc region is proline.

Page 3

Lazar et al. teach a monoclonal antibody comprising a variant Fc region wherein said variant Fc region comprises an amino acid substitution of preexisting residue proline in position 247 with isoleucine (e.g. see paragraphs [0022]-[0024] pages 52-53). Further, Lazar et al. teach that said variant Fc region can be human IgG1 Fc region and said antibody can be anti-CD20 monoclonal antibody (e.g. see paragraphs [0087] and [0101]). Furthermore, Lazar et al. teach composition comprising said monoclonal antianti-CD20 antibody comprising the variant Fc region (e.g. see paragraph [0118]).

Therefore, the reference teachings anticipate the claimed invention.

- 6. No claim is allowed.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chun Dahle whose telephone number is 571-272-8142. The examiner can normally be reached on 8:30-5:00. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor Eileen O'Hara can be reached 571-272-0878. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
